PROFILE

Passionate Full Stack JavaScript Developer with a strong foundation in web development technologies. Experienced in building dynamic and responsive user interfaces with JS frameworks. Skilled in server-side development, with a solid understanding of database management. Committed to continuous learning and self-education, demonstrated through a portfolio of self-made projects that showcase creativity, problem-solving, and a keen eye for detail. Eager to contribute to innovative and collaborative development teams, bringing a blend of technical proficiency and a proactive approach to problem-solving.

WORK EXPERIENCE

Full-Stack JavaScript Developer - Internship

Code Desk   October 2023 - Present

- Implemented responsive design principles, optimizing the websites for accessibility across diverse devices and screen sizes.
- Proficiently executing all CRUD operations to manage and manipulate data effectively
- Leveraged advanced skills in React and Next JS to develop dynamic and engaging features, including registration and login forms, authentication mechanisms, and product listings.
- Daily meetings with the superiors to present all the work I have done during the past day.
- Building experience by taking a notes perceived by the senior developers and make the corrections afterwards.

E-commerce Development - Tummytox

Code Academy   January 2023 - September 2023

- Developed a dynamic and responsive e-commerce site using Next.js, showcasing expertise in JavaScript for both front-end and back-end functionality.
- Utilized MongoDB to manage the database efficiently, to store and retrieve product information, user details, and other relevant data, implementing all CRUD (Create, Read, Update, Delete) operations seamlessly
- Developed and enforced user and admin privileges, creating a structured and secure environment for both customers and administrators.
- Implemented crucial features such as product listing by categories, a shopping cart, wishlist, user authentication (log-in and register), and user roles (user and admin) for a comprehensive user experience.

Mechanical engineer

MIKROSAM - Prilep, N. Macedonia   2020-2023

- Analyzing and reviewing technical specifications of new potential projects I will lead or work on
- Discuss and optimize the solutions with the team and superiors
- 3D-designing and modeling, making technical drawings
- Leading and coordinating the activities of the other engineers and workers of my team since the start of the project till the end of its installation.
- Actively monitoring of the mounting and installing process and resolving the problems we face in the final steps
- Final testing and demonstration of the machine with checklist of specifications and actions that should be explained to the buyers
